

AERO-MARINE TECHNOLOGIES, INC.

When Service and Experience Matter

Did You Know?

Applicable to the A320 and E-Jet families of aircraft, the 14330-375 is one of the most common vacuum generators that we service.

The most common issues with the 14330-375 are:

- Bearing Washout
- Inlet and Exhaust Corrosion
- Post-Second Stage Corrosion
- Flange Corrosion
- Impeller Rub and Corrosion

Our repair solutions can restore units that have even the most

severe damage. Our processes provide an additional level of future corrosion protection that will keep your unit in service longer and reduce operating costs.

Aero-Marine Technologies specializes in the repair and overhaul of all common vacuum generators including:

606802-2

14330-375

14330-350
